Subject: MLPA

MLPA is putting a serious stain on my fishing tackle business. I make my living with fishing tackle business and with the recent cutback in salmon, rockfish and now curtain fishing area with complication of the MLPA. What is amazing to me is the attack on anglers access. No regards to high seas wholesale slaughter of our fish by illegal fishing vessels from foreign countries.. Nothing said about sea lions waylaying fish at choke points. Nothing said about diverting the water from the Delta. Just do nothing about these critical things and just do what is the easiest control humans and their access.
